第一部分: 風險承擔程度及投資需要

Part 1: Risk Profile and Investment Needs

問題 7 是水印問題,負責的持牌人應清楚地知悉水印問題是確保德林證券(香港)有限公司採取謹慎措施的關鍵(如需要)。例如,RPQ的結果可能表明客戶的總體風險概況類別(GRPC)為進取型,但水印問題進一步提供了相關信息,即客戶只接受那些在-5%到+5%之間浮動的潛在回報投資。 在這種情況下,德林證券(香港)有限公司應採取審慎措施,客戶的 GRPC上限為 2 (增長)。對於問題 7 中的 D 和 E 選項,因爲客戶已表明其可接受相對較高的風險,客戶的 GRPC將不設上限。

Q7 is a watermark question. The responsible licensed person should be aware that the watermark question is a key question to enable DL SECURITIES to take a prudent approach if needed. For example, the result of RPQ might show that the client's General Risk Profile Category ("GRPC") as aggressive but this watermark question might further provide information showing that he can only accept investments with fluctuation between -5% and +5% as potential return. In this case, DL SECURITIES limited shall take a prudent approach, the GRPC for that client is to be capped as 2 (moderate). For Options D & E of Question 7, client's GRPC would not be capped as client already indicated that he could accept high risk).

第二部分: 投資者分類

Part 2: Investor Characterization ("IC")

第二部分的問題雖未指定任何風險等級,但卻是評估客戶是否具備衍生工具知識以履行合適性評估義務的重要信息。負責的持牌人應時刻參考第二部分中客戶提供的信息,以評估某種產品是否適宜該客戶,而不僅僅將客戶的風險等級與產品的風險等級進行機械式配對。

The questions under Part 2 are not assigned with any risk rating but they are important information in assessing whether the client has derivative knowledge for the purpose of discharging the suitability obligations. The responsible licensed person should always refer to the information provided by the client under Part 2 in assessing whether a product is suitable for the client, rather than only mechanically matching the client's risk rating with the product risk rating.
